

Sponsored Symposia

SonoSync™ demonstration

Thursday 19 May, 8.15am – 8.45am, Wellcome Trust Lecture Hall

SonoSync™ is a real-time image sharing solution that allows collaborative communication for care guide and training between doctors and sonographers in remote locations. In addition, voice chatting and real-time marking functionality within the ultrasound images are provided for efficient communication. Additional functions such as MultiVue allow healthcare professionals to monitor multiple ultrasound images on a single screen.

Prof Antonia Testa from Gemelli University Hospital in Rome will comment and discuss a scan conducted in real-time with one of her team in Rome for the benefit of conference delegates.

Professor Antonia Testa Professor of Gynaecology, Gemelli University Hospital, Rome
Professor Tom Bourne Professor of Obstetrics & Gynaecology Imperial College London

Improved workflow efficiency in ultrasound whilst reducing HPV cross contamination risk

Thursday 19 May, 1.00pm–1.45pm, Wellcome Trust Lecture Hall

A look at the latest HPV research evidence and cross-contamination risk highlighting the importance of effective ultrasound probe decontamination.

New Imperial College Hospital Study: Comparing ultraviolet vaginal ultrasound probe disinfection with a Chlorine Dioxide wipe system.

Dr Chris Kyriacou PhD Research Fellow, Tommy's National Centre for Miscarriage Research, Imperial College London
Mr Glen Ewing UK Country Manager, Germitec

East meets West – Focus on cardiology

Friday 20 May, 8.30am–9.30am, The Kohn Centre

This session will be focused on the imaging of cardiac abnormalities commonly associated with genetic conditions, bringing together experts from South Korea, Italy and the UK.

Professor Ja Young Kwon Professor of Obstetrics & Gynaecology, Yonsei University College of Medicine, Yonsei Medical Center, Yonsei Health System

Professor Mi-Young Lee Associate Professor of Obstetrics & Gynaecology, Asan Medical Center, University of Ulsan College of Medicine

Professor Tullio Ghi Professor of Obstetrics & Gynaecology, University of Parma

Professor Christoph Lees Professor of Obstetrics & Gynaecology, Imperial College London

Connecting science and clinical practice

Friday 20 May, 1.00pm-1.45pm, The Kohn Centre

The Astraia software is one of the world's leading OB/GYN documentation solutions. Our clinical reporting modules are characterised by a practice-oriented workflow and evidence-based medical content with standardised terminology in more than 20 languages.

Dr David M. Stucki Scientific Product Manager, Astraia Software
